PROJECTS & PORTFOLIO HIGHLIGHTS

InfiniTic – Analogue Watches Web Landing Page ([view prototype](#))

Designed a modern smartwatch interface focused on clarity, usability, and brand identity.

Flowsight – Sustainable Resource Analytics Dashboard ([view prototype](#))

A water and energy monitoring dashboard designed to help businesses track their environmental impact.

Spendly – Personal Finance App UI ([view prototype](#))

Built a user-centric budgeting app design with AI-based financial insights and clean navigation.

Viewly – OTT Platform UI ([view prototype](#))

Designed a personalized streaming app interface, emphasizing accessibility and smart content discovery.

Scrap X – Scrap Buying & Selling App UI ([view prototype](#))

Designed a seamless marketplace app for scrap buyers and sellers. Created an in-depth case study covering user research, flow mapping, and modern UI elements for better usability.

CaliFit – Calisthenics Training App UI ([view prototype](#))

Created a fitness app focused on calisthenics training, featuring personalized routines, progress tracking, and an AI-powered virtual trainer. Documented the full UX process in a detailed case study.

StoneCraft – Construction Web Landing Page ([view prototype](#))

Developed a clean and professional UI for a construction company website, highlighting services, projects, and contact features with an industry-specific design approach.
